Questions :

What is the percentage of correct classification of both(Purchased & Not-purchased) to the total input of the test set? 90%

What is the percentage of correct classification of(Purchased) to the total input of (Purchased) in the test set? 88%

What is the percentage of correct classification of(Not-purchased) to the total input of (Not-purchased) in the test set? 92%

What is the percentage of correct classification of (Not-purchased) to sum of correctly Classified as (Not-purchased) and wrongly classified as (Not-purchased) in the test set? 93%

What is the percentage of correct classification of (Purchased) to sum of correctly Classified as (Purchased) and wrongly classified as (Purchased) in the test set? 86%

What is the overall performance of Not-purchased? 92%

What is the overall performance of purchased? 87%

What is the average performance of Precision(correctly and wrongly classified) 89%

What is the average performance of Recall(correctly classified)90%

What is the average performance of F1-Measure(overall performance)90%

What is the sum of product of proportion rate(Weight) of Precision? 90%

What is the sum of product of proportion rate(Weight) of Recall? 90%

What is the sum of product of proportion rate(Weight) of F1-Measure? 90%
